

Connector Plug Wiring

Probe: If connecting to connecting to an Aquacheck radio of any kind a 3 pin weather-pack will be required. If a Aquacheck radio is ordered on the same ticket, or request is made probes can be wired with this plug prior to shipping. If probe did not come prewired the necessary parts can be found at your local John Deere dealer.

- Part numbers for the probe plug: RE12364 (1)
 R78057 (3)
 57M9219 (3)

Pinout:

Port A	Data	Blue
Port B	Ground	Green/Yellow
Port C	Power	Brown

T1 unit: This unit comes prewired with a 3 pin weather-pack connector. All parts for the connector can be found at your local John Deere Dealer should the plug need replacement.

- Part numbers for the T1 radio plug: R78054 (1)
 R78058 (3)
 57M9219 (3)

Pinout:

Pin:		Wire Color
Port A	Data	Blue
Port B	Ground	Green/Yellow
Port C	Power	Brown

RS210 Cell: This

unit should come with an

adapter cable (shown below). This cable converts the 8-pin plug on the unit into the standard 3 pin weather-pack used on the probes. Most parts can be found at your local John Deere Dealer,

however the 8 pin coupler may need to be sourced elsewhere.

Part numbers for the 3 pin weather-pack plug: R78054 (1)

R78058 (3)

57M9219 (3)

8 Pin coupler: CONXALL 6282-8SG-311

Pinout:

3 Pin Weatherpack		8 Pin Coupler
Port A	Data	A (6)
Port B	Ground	GND (8)
Port C	Power	+V (1)

*Small dot on plug side denotes pin 1 (+V)
